## Find Your Optimal Deductible

Balance premium savings against potential out-of-pocket costs to find the right deductible for your situation.

**Policy Type**

Auto Insurance

**Current Deductible ($)**

500

**Current Annual Premium ($)**

1200

**Emergency Fund Available ($)**

500

How much could you pay out of pocket if needed?

**Claims in Past 5 Years**

None

**Risk Tolerance**

Medium - Balanced approach

Optimize

### Recommendation

**$500 Deductible**

Your current deductible appears optimal for your situation.

Based on your financial situation and medium risk tolerance, no change is recommended.

### Deductible Options Analysis

| | | |
|---|---|---|
| $250 | $1,290/yr | Expected: $1315/yr |
| $500 (current) recommended | $1,200/yr | Expected: $1250/yr |
| $1,000 | $1,080/yr | Expected: $1180/yr |
| $1,500 | $960/yr | Expected: $1110/yr |
| $2,000 | $840/yr | Expected: $1040/yr |
| $2,500 | $720/yr | Expected: $970/yr |
| $5,000 | $720/yr | Expected: $1220/yr |

= covered by emergency fund

**AI Analysis**

The recommended deductible of $500 aligns well with your medium risk tolerance and the size of your emergency fund, as it ensures you can cover out-of-pocket costs if needed without financial strain. Since you haven't filed any claims in the past five years, you might consider increasing your deductible to lower your premium, but only after growing your emergency fund to comfortably cover a higher deductible. Hidden factors to consider include the likelihood of future claims based on your driving habits and local conditions, as well as the potential impact of inflation on repair costs, which could make a higher deductible more burdensome.
